○ AVAILABLE FOR REMOTE · HYBRID · MADRID-BASED ROLES

Project Manager with a real executive track record. Before managing technology projects, I led operations of up to 560+ people across four countries with P&L above €12M/year. At Ayesa I transferred that experience into technology consulting and progressed into a Project Manager role at ICEX. In parallel, I built a solid Computer Science and AI foundation and turn it into real projects through TransformIA. My value is connecting business, people, delivery, and technology.

PORTFOLIO · TECHNOLOGY EVOLUTION

TECHNOLOGY AS A CONTINUOUS THREAD · TRANSFORMIA

From technical curiosity to building AI systems

My relationship with technology started long before AI: I grew up building and taking apart computers with my father, from Spectrum and 386/486 PCs to assembling my own Pentium III. From 2020/2021 I began studying AI systematically; in 2023 I completed 200 hours of Machine Learning and AI, followed by CS50x and CS50AI in 2026. TransformIA is where I turn that evolution into real work: I design products, agents, and applied-AI systems with one clear obsession - they must be useful to the business, controllable, and demonstrable. I continue studying AI engineering and Azure.
